April 2025

MAHA UK's in-demand rising roller brake testers to be showcased at Road Transport Expo

• **Updated regulations and the emphasis of using premium workshop equipment will be the collaborative message from MAHA UK when greeting visitors to its stand at Road Transport Expo (RTX).**

Wisbech, 15th April 2025. The three-day event, dubbed the “one-stop industry event that’s all about the truck”, will take place at NAEC, Stoneleigh between the 24th and 26th June.

After a bumper 2024 event, which saw more than 10,000 visitors attend – a 24% increase from the previous year – MAHA UK is confident of another fantastic showing, welcoming existing and potential new partners.

The workshop equipment supplier will join truck OEMs, body builders, trailer manufacturers, tanker brands, tyre producers, workshop specialists and other industry stakeholders in showcasing its solutions.

With the brake testing rules changing in April this year, emphasising the need for braking systems to be tested under realistic conditions to improve road safety, MAHA UK's four-person team of Neil Ebbs, Luke Fuller, James Thompson and Louis Tunmore will be pleased to address attendees' questions about the topic, as well as highlight MAHA UK's compliant solution.

The MBT 7250 commercial brake tester includes a rising roller bed option. It can be elevated by 250mm; doing so simulates axle loads of up to 10 tonnes and offers a reliable alternative to traditional laden testing when external loading isn't possible.

MAHA UK has already installed numerous such products and is continuing to receive ample enquiries for this equipment, so it is prepared for significant interest at RTX.

Away from the commercial brake tester, C_RGA mobile column lifts will also be displayed on MAHA UK's large, open stand. Since their launch in 2024, there has been much interest, thanks in part to the lithium-ion battery that accompanies the lift as standard – meaning more lifts and less downtime – so the company is hopeful of the same result this year.

MAHA UK Managing Director, Neil Ebbs, said: “The industry is adjusting to the new brake testing rules, and we are supporting the sector by supplying equipment that meets standards. At Road Transport Expo, we will be reiterating and, importantly, showing visitors how we are achieving those standards.

“We are also confident that the enthusiasm shown towards our mobile column lifts will be evident once more. We are confident that the mix of our equipment and talking points in the industry will serve up a strong showing.”

MAHA UK will be based on **Stand G45**.

About MAHA UK

MAHA is a premium workshop equipment manufacturer, one that is trusted by MOT and ATF centres, as well as maintenance and repair workshops across the UK.

Its portfolio includes brake testers, workshop lifts, headlight aligners and axle play detectors – all vital solutions to help technicians and testers inspect, test and repair all types of vehicles, such as passenger vehicles, LCVs, HGVs, motorcycles, utility and special-purpose vehicles.

Another key part of MAHA UK's business is its array of chassis dynamometers. MAHA has been a long-standing and trusted partner to vehicle performance centres, motorsport teams and racetracks worldwide, thanks to the dynamometers' ability to conduct performance measurements accurately and consistently, as well as support customers with tuning and diagnostic capabilities.
