Headlight Tester

### DESCRIPTION:

- ◆ Analogue device for quick and accurate testing and adjustment of vehicle headlights
- ◆ Height-adjustable projection screen with % scale
- ◆ Subjective analysis of results based on visual assessment of the headlight projection on the screen
- ◆ Robust construction, also suitable for test lanes
- ◆ Rotatable mirror for device alignment to vehicle
- ◆ Automatic latching of the light collecting box to the precision aluminium guide column facilitates handling and optimises reproducibility
- ◆ Extremely thin Fresnel lens made from material with optimised refractive index for suppressing blue and red fringing increases measurement accuracy significantly
- ◆ Large Fresnel lens for easy positioning in front of the headlights helps speed up the entire set-up process
- ◆ Anodised heat deflection sheet to prevent overheating as a result of direct sunlight even without use of the device covering hood
- ◆ Pre-configured as standard for use on optional guide rails so that equipment runs in straight line after alignment
